Message From PRINCIPAL

Education that brings people from darkness to light, unknown to known and makes everyone understand & differentiate between right and wrong. it is a kind of discipline tat is concerned with methods of teaching & learning in schools. Education imparts knowledge, learning and values to the children taking concern from parents & teachers. It is designed to guide children in learning culture and moulding their bahaviour in the ways of adulthood and guiding & nurturing them towards their various specific & important role in society. As society grows more complex, the quantity of knowledge passes from one generation to the next one and becomes more than anyone can know and so there must be a selective and efficient means of cultural transformation. Educational experiences become less directly related to daily life as society becomes more complex. And when we concentrate upon learning in a formal atmosphere that permits children to learn far more of their culture than they are able to do by observing and imitating. Rajkamal Saraswati Vidya Mandir is trying to impart such kind of education that could make the children to realize their relevance to the society and the country.
